

BMW Wireless CarPlay Installation Diagram

Dip Switch

Reconnect the original car screen LVDS interface

(The reset button must be pressed/power off after toggling the DIP switch for it to be effective)

DIP S/W	DIP switch status	Function Description
DIP switch 1	OFF/ON	8.8 inch / Invalid
DIP switch 2	OFF/ON	Invalid/Invalid
DIP switch 3	OFF/ON	Invalid/Invalid
DIP switch 4	OFF/ON	Invalid/Invalid
DIP switch 5	OFF/ON	Electric knob / Standard knob
DIP switch 6	OFF/ON	Invalid/Invalid
DIP switch 7	OFF/ON	Invalid/Invalid
DIP switch 8	OFF/ON	Aftermarket Rear camera/Original Rear camera

Before switching to CarPlay, the original car must be switched to AUX mode.

Long press <MENU> to switch to CarPlay, long press to switch status and exit, short press to go back, use the knob to select, turn the knob down to activate Siri, and use the up and down buttons on the knob to skip tracks.

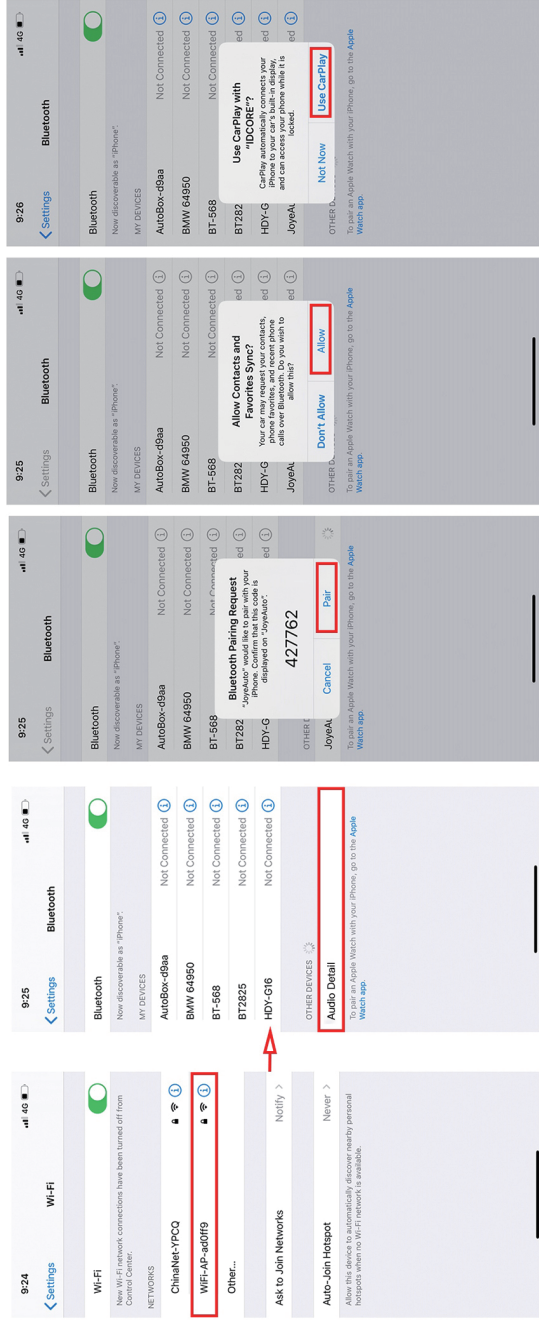

How to Connect Wireless Apple CarPlay

1, Long press switch button (different car with different switch button, check from installation diagram) to enter system main menu as below (BMW for example):

2, Then turn ON Wi-Fi from iPhone's settings, you will find option of "WiFi-AP-****", but DO NOT need connect it, and DON'T connect any other network.

Turn ON Bluetooth, find and click "Audio Detail", then according below steps get wireless connection (Note: If "Audio Detail" shows connected, but didn't go to CarPlay, then click Setup -> Bluetooth -> Paired device -> WiFi CarPlay then iPhone will show Use CarPlay request)

3, After 5 sec, it will enter CarPlay screen automatically, then enjoying...
